Pupils with special needs should have the same access and quality of education as anybody else. Now parents make the last decision in choosing to put a child in general or special school. Pupils are provided with an appropriate school environment both for learning and social inclusion. Our institution belongs to a wide range of schools for pupils with special needs so participants can see how special education functions in our country. We cooperate with other institutions involved in special education which will be visited. We hope to learn about the approaches and opinions of participants involved in special education abroad and to compare the level of inclusion in individual countries.</p> <p>What?</p> <p>Participants will learn about:</p> <ul style="list-style-type: none">• new approaches to special education in the Czech Republic;• methods and tools used in special schools;• opportunities in our region for pupils with special needs (primary and secondary education);• similarities and differences of special education methods in participants' countries. <p>How?</p> <p>Participants will:</p> <ul style="list-style-type: none">• visit special education schools and the association supporting people with intellectual and multiple disabilities in Czech Republic and Special Education Department of Faculty of Education at Charles University in Prague;• observe teachers in classrooms and a in local training college;• meet representatives of education authorities and the teachers. <p>Whom?</p>
